ordered for a fixed period will be continued until

cancelled.

Orders for extra copies of the Daily Press should

be sent before 11 a.m. on the day of publication.

After that hour the supply is limited.

The Daily Press.

HONGKONG, APRIL 30th, 1893.

The Colonial Treasurer's annual statement

of revenue and expenditure, which appears

in Saturday's Gazette, shows a gratifying

increase in the revenue, and a balance to carry

forward in spite of a considerable augmen-

tation in the expenditure. The total re-

venue for 1892 was \$1,209,517.08, against

\$1,120,796.77, in 1891, showing an increase

over last year of \$88,720.31. The principal

sources from whence this increment was de-

rived were the Police, Lighting, &c., rates to

the amount of \$81,141.43, the opium mono-

poly, which yielded \$21,030.04 more than in

1891; and leased lands, which returned an

excess of \$17,351.66 over the income of the

previous year. There was also an increase

of \$9,966.25 in the amount of interest on the

surplus deposited in the Banks. The item

showing the largest decrease was stamps,

under which bidding there was a falling off,

as compared with 1891, of \$18,360.32. This,

of course, is readily explainable; the land

speculation had ceased in 1892, and the in-

come from this source naturally returned to

its normal level. Considering all things, the

stamp revenue was very large last year, ag-

gregating no less than \$146,920.59, an

amount which testifies pretty strongly to the

commercial activity of the Colony. The

light dues display an increase of \$3,616.19,

and the sum derived from rents of buildings

was more than five thousand dollars larger

than in 1891. The revenue exceeded the

estimate by \$103,222.88, a very gratifying

circumstance, proving the soundness of the

Colony to be in a thoroughly healthy condi-

tion.

On the other side of the account the in-

crease in the expenditure more than kept

pace with the increase in the revenue, though

it still leaves a substantial balance. The net

increase in expenditure was \$113,322.82, but

of this amount more than \$70,000 went to

the account of public works, roads, streets,

and bridges, while \$9,562.08 went to that of

gratuities and pensions. The establishment

of a new department, that of the Govern-

ment Marine Surveyor, entailed another ad-

dition to the expenditure of \$9,700.77, an

outlay which is more than repaid by fees

charged for surveys made. A purchase of

land and houses figures for \$2,600, which is

a further exceptional disbursement. Alto-

gether most of the increase in expenditure

occurred on public works or in the estab-

lishment of revenue earning services. An

increase of \$3,174.22 in the vote for the Fire

Brigade was a judicious outlay to which

no possible objection can be taken. The

public works now in hand will consume a

very large portion of the surplus accumulated,

but the revenue shows every sign of vitality,

and there is no reason to fear any decline

in the amount for the current year. The very

substantial increase in the amount yielded

by the house tax leads us to indulge in the

hope that the Government may next year see

their way to make a reduction in this tax,

which is now levied at the rate of twelve per

cent. For one brief year, in a moment of

liberality, Sir John Pope Hennessy reduced

this tax to ten per cent., but the following

year he restored it to the old amount. We

trust that Sir John Pope Hennessy's adminis-

tration may be characterized by a permanent re-

duction of taxation. The tax may not be very

heavy in itself, but the cost of living, joined

with the high rents, presses rather heavily

upon the residents, especially the European

and the Chinese storekeepers of the better

class, whose expenses are large. The object of

the Government is to make the revenue meet

the expenditure, not to pile up surpluses for

the benefit of another generation. While we

have no right to begrudge a legacy of debt

to our successors there is no reason why we

should bear all their burdens in advance.

EXTRACTS.

TO A WED.

What wondrous wind, disorienting, faint,
Hither impelled thy pale green sail,
Why vouchest thou to Nature's virtue plastic
On such a need?

How, where the sunbeams rose and stately lay,
Through the bright hours their crowns of effluence,
And with rich perfume in the twilight stilling
Down the air dim;

Where by the faint its tender beam in brightness,
Sweet eyes are turned to Love's benighted star;
Or fairies frolic while the summer lightning
Down the air dim;

'Mid these choicest hours, in this immaculate garden
Beauty's loved hand, plucking a rose, a rose,
Not here, not here may'st thou have place or pardon,
'Unguided weed!

Keep thou not melodies of bird and bee,
Rains come at night, and tempest winds blow hither
Such are for Nature's darling, but for thee,
Wither, weed, wither!

DR. CARVER ON BRITISH ROYALTY.
The well-known poet, Dr. W. P. Carver, has communicated to the New York press a report of his experiences in Europe. "My shooting caused such a sensation in England that within a few days I received a command to shoot before the Prince of Wales at Sandringham. There I shot before the Prince and Princess and their family. I have never been so much honored, and they were so well pleased that I had to repeat the performance. The Prince is passionately fond of shooting, and took the greatest interest in all I did, keeping the score himself. He even begged me to shoot a Mallard duck, and I shot it for him. I was then taken back in my life. The young prince had to borrow rifle, ammunition, and my horse, and they went tearing all over the beautiful lawn banging away at everything. It was more like a circus than anything else. The Prince of Wales got a rifle and 700 rounds of ammunition, and when he had to go up to London on Prince George borrowed the rifle, and next time his father wanted to practice he had to send to London for more cartridges."

SINGULAR WEDDING.
In the suburb of Frankfurt, Philadelphia, the winter residence of circus people and side-show curiosities, a wedding of an unusual character occurred last evening. R. R. Moffitt, a tattooed man, and Miss Leo, a woman of the same description, were united in the bonds of matrimony. A large number of "freaks" as they are called in the profession, witnessed the ceremony. The bride has a black beard three inches long, and the groom is as handsome a piece of mosaic work as there is in America. Miss Leo is 26 years old and her husband was passed forty. The first time she was the "Russian Giantess," a five hundred pound Venus, who died of dyspepsia in 1880. Before the season ended Moffitt married a "Circus beauty" of Russian extraction. She died last summer, and before the tattooed widow was made in love with the "Spanish Bearded Lady." Although bearded, she possessed all the charms of a young girl. Miss Leo was compelled to use all his eloquence to persuade her to accept him. John Gray, the sword-swallower, in the step-father of Miss Leo, and he gave her away. Miss Leo wanted to have her beard shaved off in honor of the occasion, but Mr. Moffitt, who is of a practical turn of mind, opposed it on the ground that she might not be able to raise another crop, a wish which her value as a "curiosity" would be totally destroyed. Mr. and Mrs. Moffitt went to New York on a wedding tour. - New York Herald.

A BRIGHT BEGINNING.
A medical man writes to the *Dietetic Revue*: "I have much pleasure in sending you an account of my first year of vegetarian diet. I did not like the idea of giving up my meat because I thought it necessary, but because I liked it. After my first attempts I went on well, and an now I am as well as ever. I am not a bit weaker, and I am actually a better man. I have done away with my desire for alcohol and tobacco, which are now positively obnoxious to me. My senses are clearer, my mental power is greatly increased. I work better for longer periods, and grasp ideas much more quickly than formerly. I have done more hard mental work this year than for many years past. I have been able to do more work in less time than since my final medical examination, which was passed on vegetarian diet. My bodily powers are much better, and I can take long walks without much fatigue. My spirits are lighter, and I feel an almost continual flow of good humor. Bile attacks, headaches, constipation, &c., leave me soon after the adoption of this diet. I was threatened with rheumatism, but since my experiment no signs have developed themselves. I am so pleased with my diet that I hope to continue it all my life. My own results have been so good that I wish every one else to give it a fair trial, and note the results. My friends say I am looking well upon it, and I have gained about seven pounds in weight. My food consists chiefly of whole wheat bread and fruit. I am as well as ever for my meals, and eat with relish, and I know I am not laying up for myself future disease."

THE OLDEST MILITARY NEWSPAPER.
The celebration on the 9th February of the Jubilee of the *United Service Gazette*, which claimed on that occasion to be the oldest military newspaper in the world, and the very first specially devoted to military matters, has provoked a strong protest from the Russian Press. The first number of the *United Service Gazette* was issued on the 9th of February 1812, and it was the first of the *United Service Gazette* was published in March 1812, of 20 years earlier. The idea of a purely military newspaper is ascribed to M. P. Petrovich, a foreigner in the Russian service, who received permission and funds to start it from the Government in 1812, under the control of Yekaterin, the strictest post. After this it was edited by a series of Generals of greater and lesser note, and besides serving as the official military gazette and the medium for the discussion of army matters, exercised considerable political influence. The height of its reputation was reached shortly before the Polish revolt of 1863, when its utterances were regarded abroad as being inspired by the Foreign Office as well as by the Minister of War, while at home it championed the views of the War Minister, Count Miliutin, against his opponents in the Polish question. In 1883 the *Czar* arrived at the decision which was now to be made, and an order was issued prohibiting *United Service Gazette* from going beyond purely military matters in its columns. The consequence was that the paper at once lost its circulation, and it was worked now at a loss to the State of something like £1,000 a year. Beyond the Government Gazette and a few telegrams and newspaper cuttings, its daily issue of four small pages rarely contains anything except a scanty chronicle of military operations abroad or a poorly written article on army matters. But with all its defects it has been enough to maintain that it is the "oldest military newspaper in the world."
